True educators continuously seek out new ideas and fresh perspectives.

Teachers are always thinking about their students, but devotion to their progress shouldn't come at the expense of your own. That's why we've created a guide for teachers based on our nine future-ready skill domains: self-awareness, collaboration, critical thinking, problem solving, creativity, persistence, initiative, real-world effectiveness, and community engagement.

The resources we've included will help you both in and outside the classroom. Some were written or designed specifically for teachers, while others encourage personal or professional growth.

Keep reading to get started on becoming your best self!

Self-Awareness

KEY SKILLS

Block out distractions and stay focused on the present. Cultivate a positive attitude and use good judgment to reinforce your image as a role model for your students. Lastly, allow students at least a modicum of self-direction, which will help them to realize their own academic potential.

The ability to reflect upon one's behavior and manage emotions is crucial for both teachers and students. These tools will assist with focus, emotional flexibility, cultivating optimism, and objectivity.

“If your emotional abilities aren’t in hand, if you don’t have self-awareness, if you are not able to manage your distressing emotions, if you can’t have empathy and have effective relationships, then no matter how smart you are, you are not going to get very far.” – Daniel Goleman

10 Ways Teachers Can Create a Positive Learning Environment

There is a direct relationship between the kind of learning environment teachers create in their classrooms and student achievement. Here are 10 ways to develop a positive one.

Dealing With Parents, Peers, and Administrators

While establishing relationships with students is paramount in the classroom, you should outline strategies for communicating with adults as well. [Reach out to parents](#) at the first sign of a problem, [build community](#) with co-workers to improve your mental and physical health, and work towards creating productive dialogues with [administrators](#).

NEXT UP: Collaboration

Collaboration

KEY SKILLS

In order to collaborate productively with fellow teachers, administrators, parents, and students, you must be able to effectively communicate thoughts, ideas, concepts, and emotions. You should remain open to new perspectives, empathetic to the needs of others, and realistic about your own views.

For teachers, the ability to communicate effectively — both verbally and in writing, individually or in a group — is a critical job qualification. It's equally important to continually re-evaluate your communication skills, introduce new perspectives and truly understand the needs of your students. Here are some resources to help.

[Is It Enough for Teachers to Have a Growth Mindset?](#)

To get students develop a growth mindset, you can't just talk the talk — you must actually walk the walk and incorporate it into your teaching practice.

NEXT UP: [Real-world effectiveness](#)

Real-world effectiveness

KEY SKILLS

Lead your students to new achievements and guide the development of new skills. Adapt to new challenges and employ daily reflection as a tool for personal growth.

Walk the walk, practice what you preach, make sh*t happen... however you articulate it, applying what you (and your students) learn in the classroom to the real world is a skill that needs constant nurturing and development.

[How to Create a Culture of Achievement in Your School and Classroom](#)

While most school improvement plans or education reforms are centered around curriculum, things like classroom atmosphere and school identity can play a large (if intangible) role in student achievement. Learn how to create a positive culture of achievement with this book, which you can get in print or as an e-book.

[Why Don't We Teach Life Skills In Our Schools?](#)

Young adults are entering the workforce without learning communication skills, conflict management, how to accomplish practical tasks, or even basic empathy. This hurts their career prospects and delays their entrance into “adulthood” — so why don't we teach these things in schools?
