

Mathematical Thinking at Grade 1

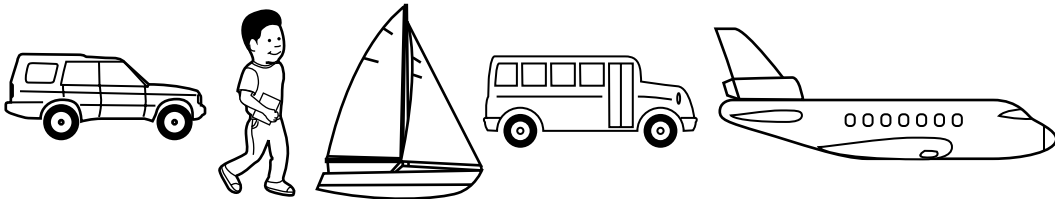

What Does It Show?

This is Max's drawing. It shows how students in his class get to school.

**Interesting Tidbit**

Of every 100 school children in the United States, only 13 walk to school!

- 1 Circle the pictures that show how students get to school.

- 2 How many students get to school by bus? _____
- 3 How many students get to school by car? _____
- 4 How many students walk to school? _____
- 5 How many students are in Max's class? _____
- 6 On another sheet of paper, draw a picture that shows how you get to school.
